

Long strides, head back
Strike fear into their hearts
Keep your head high

Put up a fight

We just want what's right
But there's no more time
For the sideline

Put up a fight x 2

We get so fired up when they say
Girls can't run, girls can't shoot, girls can't fly

Put up a fight

You won't change their minds
If you don't try
If you just give up, then they think they're right

Put up a fight

Chorus

You can fight us,
You can say that's just the way it is
We won't give up
And we know we'll win

Verse

We don't need makeup
Just to please you, no more excuses

Put up a fight

When you say like a girl, what you mean is lesser than
But we're not gonna let you decide that you're better than us
